CSC 3350 – Project Pitch

For your final projects you will be completing a series of steps throughout the semester. The first step is to pitch your game idea to the class.

Project Pitch

You will be delivering a 2-minute pitch for your project to the class. The maximum project group size is TWO, so If you are choosing to work with another person you'll both present together and are both expected to be involved in the presentation.

The focus for the presentation should be:

- An overview of your game idea
- The core mechanics
- Any notable details you are planning on for the game

For each presentation there will also be an opportunity for the class to ask questions and/or provide suggestions.

Submission

If you have any slides or other pitch materials you should upload them through the portal. If you have any issues or questions please let me know.
